

# Formula PEP Capsules (Formerly CA+)

Each Capsule Provides:

Lyophilized multiple glandular concentrates, with their natural enzymes and enzyme activators.

These freeze dried glandular tissues are produced at a low temperature, which preserves the freshness of the essential enzymes, activators and metabolic nutrients. They have natural coloring.

CONTAINS NO: yeast, sugar, salt, preservatives, artificial colors, flavors or additives and no corn, yeast, wheat, soy or milk derivatives.

## Supplement Cycles:

The goal is to consume 6 servings of 12 capsules each day.

When consumed away from meals most of the enzymes will be dispatched via the bloodstream to any unwanted protein mass (tumor) to be digested (broken down) and transported out of the body via the bloodstream, liver, bile ducts and colon.

When consumed with or near a meal a portion of the enzymes will be used to digest the food to provide fuel for repairing your body.

## ON CYCLE:

- 12 capsules 1 hour before meals (this is considered "with meals" in this cycle as the enzymes will be beyond the stomach and ready in the small intestine to digest the food when it passes through the stomach)
- 12 capsules 1 and 1/2 to 2 hours after each meal (between meals)
- 3 capsules at bedtime or after dinner meal\*
- 3 capsules at 3:30 a.m. or before breakfast meal\*

\* The goal is to consume 6 servings of 12 capsules each day. Do the best you can.

TAKE supplements up to 25 days. STOP taking supplements if you experience discomfort of any kind, that you cannot manage with coffee enemas. You may stop taking the enzymes after 3-5 days on and go to the "OFF CYCLE" for 5 days, but it is best to continue for 25 days.

DO NOT EXCEED 25 DAYS ON CYCLE

## **OFF CYCLE:**

Remain off supplements for 5 days. You must give the body time to adjust. Stay OFF supplements the full 5 days even if you feel well enough to continue.

Continue Cycling (on 25 days - off 5 days) for 9 to 18 months. Then take 4 to 6 capsules with meals and 2 capsules with snacks as long as you choose to live cancer-free and to continue metabolically supporting your being.

Capsule Container is 360 capsules

The container says: Serving size is 12 capsules per serving and contains 30 servings.

If you take as directed each container of capsules should provide 5 days of enzymes.  
If you take as directed each container of bulk should provide 7.5 days of enzymes.

Take coffee enemas as needed to manage nausea that may come as a side effect of the enzymes digesting the tumor material and the dead material moving through the circulatory system and being collected by the liver. The coffee enema, properly done, will dump some bile from the liver, which will make you feel better until the liver is full of tumor debris again.

Coffee Enema instruction: <http://www.road-to-health.com/go/enema>

Enzyme capsules for convenience, enzyme in bulk for best value, 2 capsules are equal to one teaspoon of the enzymes.

capsules = 5 day supply as directed

bulk = 7.5 day supply as directed

Bulk Container is 500 Grams

Capsule Container is 360 capsules
